14th November 2025

Parents meet and interaction with Students at Govt Primary School
,Aralimaradadoddi , Kanakapura

Other Activities :

Environmental Day :

Future Plans :

While the government provides textbooks to primary and high school students, **Saarathi** steps in to support their overall development by offering additional essential supplies.

We provide students with:

- School Bags
- Note Books
- Paint Boxes & Drawing Books
- Story Books

These items not only full fill basic educational needs but also encourage creativity, imagination, and holistic growth in young minds.

As we look ahead to 2025–26, Saarthi is committed to deepening its impact and expanding its reach. Our future plans include:

- **Expanding School Visits**
We aim to reach more primary and high schools, ensuring a greater number of students benefit from our support.
 - **Introducing Enhanced Educational Materials**
Along with school bags, we plan to distribute a wider range of educational tools such as:
 - Stationery
 - Books (educational and story-based)
 - Indoor games materials like Chess Boards, Carom Boards
 - Brain games and puzzles to foster critical thinking and problem-solving skills
 - **Hosting a Larger Community Event**
We plan to organize inter-school competitions and sports events to celebrate educational achievements and promote a spirit of unity, creativity, and healthy competition among students
-
- **Bridging the Digital Divide :**
Urban students often have access to computers and technology even at the primary school level, while their rural counterparts are left with limited or no exposure. Recognizing this gap, **Saarathi**, with the generous support of our donors, visits rural schools equipped with laptops to introduce students to the basics of computer education.
 - These interactive sessions spark curiosity and interest among students, giving them a glimpse into the digital world and encouraging them to learn more. This early exposure not only builds confidence but also helps high school students make informed choices about pursuing professional and technology-related courses after their 10th grade.
 - By bringing technology to rural classrooms, we aim to level the playing field and empower students to become part of the mainstream educational and professional landscape.

Conclusion

This period marked significant progress in supporting rural education through engaging activities and the distribution of essential resources. Our efforts at primary schools were met with heartfelt appreciation from both children and staff, reflecting the positive impact of our initiatives.

We remain deeply committed to uplifting these communities and empowering young learners. A heartfelt thank you to all our supporters—your contributions make this journey possible. We look forward to continued collaboration and meaningful associations in the future.
